<p>Phishing Template Thumbnail</p>				

¹ Outsider offers several templates for certain websites that appear similar, but each template is distinct. For example, one template may prompt victims to verify their credit card information or provide multi-factor authentication codes, while another may not. Templates that appear similar may also ask for different personal or financial information.

² Where available, the template image is identified by the web address of the website being imitated. Where Outsider does not provide a link, the file name identifying the template is provided.
